ANODIZED FINISHES INFORMATION

WHAT IS ANODIZING?

Anodizing is the successful development and control of a natural oxidation process that occurs when aluminum is exposed to the atmosphere. Electricity and chemicals are used jointly to produce a hard, transparent surface that is integral with the base aluminum.

FEATURES AND BENEFITS

- Hard durable finish
- Transparent, aesthetically pleasing appearance
- Insulative and static resistant
- Integral with the aluminum surface
- Nonmagnetic
- Thermal management properties

STANDARD AND CUSTOM PRODUCTS

A wide selection of colors and finishes to create alternative metal looks with options in finish, brightness, formability and performance. This would include Brass, Titanium, Gold and Stainless Steel.
